

## FRANCE TO SHARE IN PEACE CONFERENCE

France Gets False Synopsis  
of U. S. Note Three Days  
Before it Was Published.

(INTERNATIONAL NEWS SERVICE)  
WASHINGTON, Aug. 12.—France probably will participate in a general peace conference between the allies and soviet Russia, it was declared today by officials in close touch with the French and British embassies.

Despite France's promised help to Gen. Wrangel's government in South Russia, it was pointed out that the interests of both France and the de facto Crimean regime could be safely guarded only by Premier Millerand taking a seat at the proposed general peace conference with the Bolsheviks.

At the state department today it became more evident than ever that the Polish minister here, Prince Lubomirski, is engaged in "hopeless anticipation" if he expects the administration to amplify the very brief reference made in the Polish note conferring the "available means" to be employed to make effective the policy therein laid down. Both the state and war departments are expected military aid should not now be furnished.

The department of state has undertaken an investigation of the amazing and mysterious circulation throughout France of a false synopsis of the American note on the Polish situation which became current at least three days prior to the publication of the note itself in the U. S.

# Ore carrier "CUBORE" is great advance in American Marine Engineering.

Representing what is said to be the greatest advance in American Marine Engineering in many years, the Diesel-driven ore carrier "Cubore" will start on her maiden voyage to Cuba this week. Her trial trip was entirely successful.

The "Cubore" is propelled by a Bethlehem two-cycle oil engine of 3200 horse-power. Designed by an American, Arthur West, built by Americans, for use in an American ship, this powerful oil engine is this country's first successful attempt in a field that has been dominated up to this time exclusively by European nations.

The "Cubore" will be used for carrying ore from the Bethlehem Steel Corporation's Cuban properties to its plants in this country.

The vessel is 469 feet long, 57 feet in breadth, and 37 feet in depth. Her dead weight tonnage is 11,500.
